# medisept® nose piercing systems

*Sterilized*

The Medisept® Disposable Cartridge Nose Piercing System, is the most innovative nose piercing system available today. Our engineers have designed the Medisept® Nose Piercing System to provide piercing technicians and retailers with a safe and easy alternative to traditional nose piercing methods eliminating the costly expense of an autoclave and piercing needles.

The patented design of the Medisept® nose piercing instrument makes it easy to use, load and maintain.

*Hypoallergenic*

The Medisept® sterilized nose piercing system offers touch free operation by using individually pre-sterilized cartridges for piercing. Each sealed cartridge contains one sterilized nose piercing stud designed to pierce the nose. The nose stud remains in place during the entire healing period.

The Medisept® Nose Piercing System is designed for piercing of the nostril only. It is not intended for piercing the septum or any other part of the nose or body

# features of medisept

## Instrument Features

The ergonomic contoured grip is designed to fit hands of all sizes. The smooth linear action of the instrument helps promote precise, accurate piercing. The patented shape of the instrument accurately pierces the nose without touching the customers face.

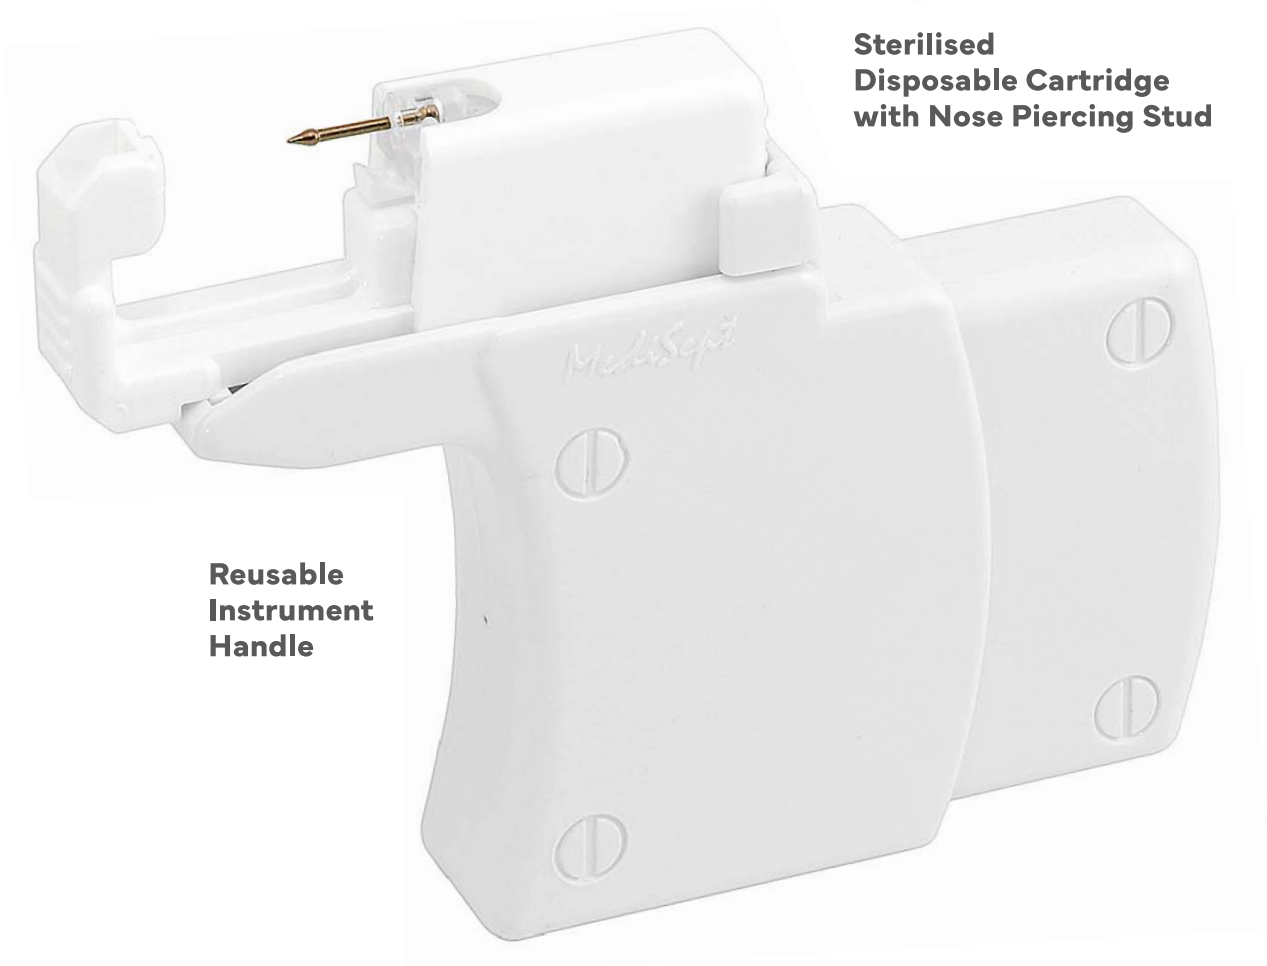

The cartridge channel allows for easy touch free loading and disposal of the sterilized piercing cartridge.

## Cartridge Features

Each cartridge is individually sterilized for safety. The unique shape of the cartridge is designed to fit easily and comfortably into the nose for accurate, virtually pain-free piercing. Each sterilized cartridge is contained in its own individual blister package enabling the user to safely load and dispose of each cartridge without touching the cartridge or piercing stud.
